Applications

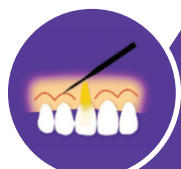

Periodontal Therapy

- Gingivitis
- Periodontitis

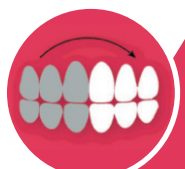

Oral Surgery

- Aphthae And Herpes
- Ablation
- Implant Exposure
- Peri-Implantitis
- Soft Tissue Excision

Mucogingival Surgery

- Frenectomy
- Operculectomy
- Gingivectomy
- Crown Lengthening

Aesthetics Dentistry

- Gummy Smile Correction
- Bleaching
- De-Pigmentation
- Teeth whitening

Endodontics

- Periapical Abscess
- Root Canal Sterilization

Bio-Stimulation

- Teeth De-Sensitization
- TMJ Pain
- Haemostasis
- Post Extraction

Why 980nm ?

- Near Infra RED laser is best suited for all dental surgical procedures and therapeutical applications.
- Versatile laser wavelength for every day dental procedures and specialized procedures like Periodontal and Aesthetic procedures.
- Near Infra RED laser light is best suited for therapeutic application due to deep penetration capabilities. Near Infra RED wavelength (980nm) is used for Intra Oral and Extra Oral pain management as well for the swelling reduction at surgical sites.

Why 635nm ?

- Adding a 635nm Wavelength to your laser unit provides many advantages. Visible 635nm laser light is good for Wound Healing, Ulcer treatment and Photo Therapy application.

Technical Specifications

Treatment	Wavelength / Maximum power	980nm-6 Watts / 635nm-200mW
	Operation Mode	Continuous / Pulsed
	Pulse Duration	0.1 Sec To 4 Sec
	Pulse Interval	0.1 Sec To 4 Sec
	Pilot Beam	635 nm Red Diode Laser, <5 mW
	User Interface	7" True Color Touchscreen
General	Dimension	210(L) * 195(W)*130(H) mm
	Weight	2.5Kg
	Warranty	2 Years

Accessories

Multi - Tip Hand Piece

Teeth Whitening Prism

TMJ 20mm

Bio Stimulation Attachment

Disposable Tips

- 400um 5mm For Soft Tissue Surgery Application
- 400um 10mm For Perio Application
- 200um 15mm For Endo Application

Kevlar Cutter

Safety Goggles

Foot Pedal

Eye Protector

Transportation Bag

Optional

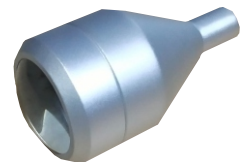

Dental Hand Piece

400um Bare Fiber

Advanced Endo Radial Tip
(200um 15mm)

Pain Therapy Attachment
